Ascension or Descension?

What is Ascension? Is it some cult or some mystery school? Will I become crazy or insane if I practice Ascension? Glamour, Maya and Illusion! For ages, people have been indulging themselves in these questions on Ascension. This is just the fear that people relate from one another from GOD knows what time ago. As a teacher, I often hear such questions that challenge the reality behind Ascension and its movement.

Today I, Melchizedek will reveal to you the truth of all these lies. Ascension is not really about someone going into the light and never coming back on earth. That is not true. In fact for true "Ascension" as what humans interpret it to take place; you would take thousands of years of evolution according to earth time. So no one would ever just become the light and disappear into thin air in a flash.

"Ascension" or I would like to term it **life transformation** is really how we are trying to get back our mastery and be the living master that we are. Not moving up and up into space while you have a physical body. So, do not mistake my words with how earth people interpret Ascension. The anchoring of light is important but not absolute. Therefore Life transformation can never be a cult or some secret school. This is because everyday of your life you are transforming your life! So how can Life transformation be a sect or discipline? It should be integrated in your life style.

No one ever goes insane, unless they force themselves to believe in things that are not of a clear consciousness. For example, no one is the "One". No any individual can liberate the world by himself. No one in this world is separated from you. So do not feel you are the only enlighten being. A truly enlightened being will just see all these as a reality he created. So one should be clear about all these thoughts that seem holy but in fact holds the poison thorn of ego.

The reason why life transformation or Ascension is so important is because it is the way how you can really realize your life should be. It is the balancing of how your life should be and making the most out of it. Most problem arise from our ego and that is the truth. However, we learn from the ego which is the truth. So whether you are open to the idea, you are ascending. Thus now I bring this open question to everyone who is reading, whether you are a reiki master or any other spiritual personnel or just some reader. Are you transforming your life because of your practice in your life?

If you have, then drop the glamour of fear and doubts. It will eventually be the only thing that will block your progression in life. No one healing modality will bring you prosperity if you do not earn it yourself. No one healing tool or crystal can attract good relationship without a good character in the first place. You are really the prime effects for all things to transform and change.

Own your personal power! Have unconditional love for yourself and others! Be in service of yourself and others! Finally lead the legions of light in everyone out of the ego's cell. I am that I am always no matter who you think you are!

Blessings

Lord Melchizedek / Rev Khemery
