### **Energy Transmutation Center**

I was told recently that there have been some changes in the energy movement especially when we start to clear energy. My friend had mention that the platinum net now sweeps down into the earth instead of sending the energy back into the source. This was quite puzzling to my friend and he did a channeling and found out about a new energy center in the inner plane. Now I would like to share this information which I later channeled from my Elohim teachers.

This new energy center that is now in the centre of the earth is called the energy transmutation center. This facility main purpose is to help mother earth to remove any negative energy that is transmitted to her. As we all know, the earth like us is a living thing. So why are we constantly giving Mother Earth the negativity and expect her to clear the negativity for us? This is the problem that most spiritual personnel do not understand.

The earth like us also have an energy limit and that she could only do that much now. There is no increase in the amount of energy that mother earth has that can be use to clear the negativity that people have. Though some healers argue that they are sending the energy of healing to the earth by grounding, most of the time they are sending **negative** energy down. This is only the normal negative energy to add on there is also a mixture of the practioner's personal energy. Most practitioners ground their energy completely into the earth. Yet, the idea of energy work is to preserve the energy with our consciousness. So why should we ground it away after all the hard work? The proper term should be balance the energy. I see many facilitators and initiates ground their energy away. This is a bit ironic.

So to solve this problem of energy dumping, the Elohims as their first task to help earth evolve built an inner plane energy transmutation center. The task force that built the center is Elohim Aloha and Peace. They are the elohims of the sixth ray and they help in bringing peace to earth. The energy transmutation centre is divided into three parts - The energy collection centre, the energy filtration centre, the energy containment center.

The energy collection center is where all the energy that you sent or ground is being collected and the energy is being harness for filtration and transmutation. So next time if you really cannot stop grounding, then, send your energy to the energy collection center. Just say "ground energy to energy transmutation

center– collection centre please thanks you.” Or visualize the energy centre and grow your roots there.

The filtration center is built to transmute the negative energy with love and light. There is a specific agent called energy transmutation agent. This agent can be release to the physical environment to clear negativity. So you may allow yourself to release the agent into you healing space after a healing session. This allows the negativity to be cleared there and then.

The Final center is the energy containment area. In here, this is where the transmuted energy is really given to the earth as vitamins and nourishment. So the theory is like drinking water. The water from the pond cannot be drunk if there is no filtration. The water may contain negative virus and effects. So the filtration ensures the earth is healthy.

Play your part in this game of life. Please do not send unwanted energy to anything just send it back to source or balance the energy in take within you. It is just a simple “send excess energy back to source with love.” This will not only help you and also earth!

The Elohim also noted that there would be new centers opened to help earth evolve. So be on a look out for all these new facilities which you can also use!
